

CRISTAL-FLO™

Cristal-Flo Side
Mount ClearPro

Cristal-Flo
Top Mount

FOR ALL THE RIGHT REASONS...

Sand filters are one of the most popular ways to filter water. They are simple, effective and require very little attention. Pool water is routed through a sand-filled pressure vessel. The sand traps particles large and small... But not all sand filters are created equal. Through innovative engineering, the Cristal-Flo filter's dirt-handling capacity is maximized, which extends the time between cleanings (backwashing). But best of all, the **Cristal-Flo** is now also available with ClearPro Technology® to make your pool water sparkle in the sun and shimmer in the moonlight.

Features :

- Available with ClearPro Technology: A patented technology to reach a very fine level of filtration, 4 times better than with a conventional sand filter. As a result the water is of crystal quality. ClearPro approaches DE filter clarity with sand filter functionality.
- Tank shape, internal component design and even hydraulic flow have been engineered to maximize filter performance and extend the time between cleanings.
- One-piece, corrosion resistant, extra-thick molded thermoplastic tank, which ensures many years of service, no matter how harsh the climate.

CRISTAL-FLO / CRISTAL-FLO WITH CLEARPRO TECHNOLOGY®

HIGH RATE SAND FILTER

Additional features include :

- Ease of maintenance thanks to the large filter opening and drain port with hand tight threaded cap
- Stainless steel, one-piece clamp connection
- Provided with a convenient large tank winterizing drain and a continuous air relief system
- Maximum working pressure bar : 3.5
- Available in top mount or side mount version with or without ClearPro Technology®
- Top mounted or side mounted, corrosion resistant, multiport selector valve included
- 5-year limited warranty

Sta-Rite innovation takes sand filtration technology to the next level by delivering superior quality, performance and value at an affordable price.

MODEL	Filter Diameter (mm)	Flow Rate (m ³ /h)	Filter Area (m ²)
T-380(-CP)	380	5	0.12
